Archuleta County Launches New Records Search and Mapping Application

The Archuleta County Assessors Department and Information Services Department announce the release of the County's first public ***web-based records search and mapping application***. This new feature is accessible from any computer that has internet capability. It allows the user to retrieve information related to parcel records and property tax information. In addition, this program has an associated map viewer for viewing things like parcel boundaries, roadways, floodways, zoning, special district and precinct boundaries, aerial imagery and other digital data.

This Internet Mapping Service (IMS) has many functionalities and capabilities, including an instructional tutorial which keeps first time users from becoming overwhelmed. The new web application can be accessed at: <http://maps.geocortex.net/imf-5.2.0/sites/archuleta/jsp/launch.jsp> or on the Archuleta County home page at www.archuletacounty.org. It is also available on the Assessor, Clerk, IS, & Treasurer pages.

It is exciting to have this new web application available to County staff and the general public. It is intended to be a useful records search tool that will provide important information as well as reduce the walk-in traffic.
