County Announces Magnesium Chloride Application Schedule

The Archuleta County Road and Bridge Department has begun the application process for Magnesium Chloride on many of the County roads. The application of magnesium chloride helps to reduce dust and maintain the durability of the road. Work is scheduled to be completed by early September. There are 34 applications scheduled covering 78.77 miles of road. To date, 21.4 miles have had magnesium chloride applied and include the following roads: CR 975, CR 988, CR 973, and CR 500 (southern end).

The Magnesium Chloride Application schedule is dependent upon many variables: weather, availability of the product, crew and staff, and equipment.

Application Sequence	Road	Miles	Status
1	CR 975	2.5	Complete
2	CR 988	3.2	Complete
3	CR 973	3.7	Complete
