PROCEDURE FOR PROCESSING SERVICE REQUESTS

The following procedure has been established as the most efficient means to provide electric service in an orderly manner without delay. This procedure works best when all parties cooperate to provide accurate, complete, and timely data.

1. It is the responsibility of the engineer, architect, contractor, builder or owner to submit to LPEA's Engineering Department a service request for the proposed project. The request must provide sufficient lead-time for engineering, determination of charges, and construction.
2. The engineer, architect, contractor, builder or owner must include with all requests for service a completed load data sheet and one copy of a plot plan. The plot plan should show preferred service and meter locations and a single-line diagram of the electrical layout. Final service and meter locations shall be determined by LPEA's Engineering Department.
3. **Additional Charges:** LPEA designs to the specific information on this form. Significant changes may result in additional charges. Charges may include, but not be limited to, additional engineering, equipment or conductor change-out and incurred labor.
